

# FOX FRESH-MESH WICKETED®

## Improve your bag performance and presentation

without having to invest in new bag filling equipment. With the Fresh Mesh Wicketed® bag, our revolutionary non-woven CLAF fabric is enhanced with a wicketed poly bag top for use on standard poly bag filling equipment.

### Benefits:

- Optional metallic band adds additional display appeal
- The one dimensional CLAF® mesh fabric design does not leave skin damaging indentions left by many woven mesh products
- Horizontal band, available in 4" – 9" heights, allows for large custom graphics and product messaging
- Fox Fresh-Mesh® extends shelf-life by letting the product breathe better because moisture and air can easily pass throughout the bag
