

FOX COMBO ULTRA SHIELD™

Get the best protection against potato greening!

Fox Packaging's latest technology, the Fox Combo Ultra Shield™ bag, provides maximum value to packers, retailers and consumers because its unique two layer black and white poly film side prevents nearly 100% of light*, dramatically decreasing potato greening and ensuring a longer shelf-life.

Benefits:

- Potatoes have little or no greening caused by light
- The mesh side ensures breathability, keeping potatoes fresh longer
- Consumers will enjoy the bag's easy open and reclose
- Consumers take home a protection against potato greening
- The Wicketed design allows for efficient packing on standard poly bag filling equipment
- The full film side provides maximum branding space
- Fox Fresh-Mesh® extends shelf-life by letting the product breathe better because moisture and air can easily pass throughout the bag

*Per independent study carried out by Michigan State University, 2010
