

WB Bagger Series

▲ BENEFITS

- Packs up to 25 bags per minute
- Three sizes of quick change infeed cans for different size bags
- No exposed bag edges mean no bags are knocked off during filling
- Vacuum generator ensures that suction is controlled when it is needed
- Single vacuum cup opens bag in least resistant spot – the middle
- Bag feed belt is adjustable to 4-5" and 6" widths without tools
- Works with poly, poly/mesh combo or full mesh wicketed bags
- Couples with all existing weighers and counters
- Easiest to clean bagger on the market
- Touchscreen for program storage
- English, French, and Spanish language options are standard

**EXCELLENT FOR LEMONS, ONIONS,
POTATOES, ORANGES AND GRAPEFRUIT**

Full polished stainless steel
construction and extremely
small footprint!

WB Bagger Series

COMMODITIES:     

THE PROVEN LINE OF AUTOMATIC WICKET BAGGERS.

Don't compromise with your wicketed bagger. We have the most experienced group of wicketed bagger engineers committed to keep the Fox WB Bagger series simple, user-friendly and the most consistent performer of any wicketed bagger. Period. The WB Bagger is so easy to run, that anyone of your team can do it.

- **Bag Pick Up** – We engineered a single suction cup that contacts the bag in the middle where it is the least resistant to open – a challenge for other machines on the market. The WB series is the most forgiving bagger made for questionable quality bags. It has proven itself to outperform all other baggers.
- **Bag Filling** – This is the only bagger on the market that ensures there are no gaps or exposed bag edges to capture 100% of the weight in the bag.
- **Food Safety Matters** – The WB series is constructed of stainless steel to eliminate the concern of painted parts. We have also made the infeed chutes removable without tools for easy sanitation of both the chutes and infeed belt. We know what is important.
- **Proven Performance** – Find out what many packers already know. This is the best bagger you can buy – guaranteed!
