

Combo Ultra Shield®

Fox Packaging prides itself on continually seeking packaging innovations that have a real impact on the quality and presentation of our customers fresh produce items.

Our latest technology is the Fox Combo Ultra Shield® potato bag. Like the standard Fox Fresh Mesh® Combo bag, our customers benefit from the combination of poly and mesh for maximum branding space, the ease of packing on standard poly bag filling equipment and ultra breathability. The added benefit, of this special potato bag is its two layer black and white poly film side that prevents nearly 100% of visible light and 90% of ultraviolet light, dramatically decreasing potato greening and ensuring a longer shelf-life.

Tinted and Opaque bags also available
